Ways to write push-foraward
of vector $[\gamma]_p$ by $T_p\phi$

$$
\begin{aligned}
T_p\phi \cdot [\gamma]_p &\equiv \phi_*(p)\big([\gamma]_p\big) \\
&\equiv \phi_*(p) \cdot [\gamma]_p \\
&\equiv \phi_*\big([\gamma]_p\big) \\
&\equiv [\phi \circ \gamma]_{\phi(p)}.
\end{aligned}
$$
